Work Experience

PPL Engineering Services Ltd - Authorising Engineer/ PPL Training - Senior WaH & CS Training Consultant

2020 - Present

A joint role as both an Authorising Engineer and a Senior Instructor for Work at Height and Confined Spaces disciplines. Developing site and system specific Safe Systems of Work and training regimes to comply with current legislation and procedures. Engaged by several large MoD Maintenance Management Organisations, commercial FM organisations and NHS Trusts.

Designing, developing and delivering a variety of training courses to ensure compliance with current legislation and procedures.

Morsafe Ltd - Authorising Engineer & Technical Training Manager 2015 - 2020

Responsible for overseeing the day to day running of the work at height and confined spaces training department, with responsibilities such as ensuring the equipment was logged, inspected and distributed accordingly as well as managing several other trainers, including ensuring they had received tutoring to be able to deliver the courses I designed to the correct standard.

As well as managing others, I also delivered training courses worldwide to a variety of high-profile clients and provided on-site consultancy and technical support in countries such as Kenya, Nepal, Cyprus, Gibraltar and the Falklands.

Rope Access Technician (Self-Employed) 2009 - 2015

Having first qualified as an IRATA Level 1 rope access technician in 2009 I began working around Europe on a self-employed basis for several large companies including Siemens & Dematic. In early 2011 I qualified as a level 2 technician.

Air Conditioning Installation and Maintenance (Self-Employed) 2005 - 2009

After leaving school I started working as an apprentice, aiding Engineers and learning while on the job. This eventually progressed until I was able to work independently and could effectively install or maintain air conditioning equipment without supervision.
